# **Authors Signature Form**

### Statement of Permission for Publication of the Manuscript in the International Journal of Medical Students

Please insert the relevant text under the subheadings below. A completed form must be signed by all authors. Please note that the *International Journal of Medical Students* (IJMS) cannot accept electronic signatures; all authors must sign by hand. Please complete multiple forms if necessary and upload the signed copy with your submission.

complete multiple forms if necessary, and upload the signed copy with your submission.		
Manuscript title:		
Corresponding author:		
Article type:		

Number of authors:

Date:

I agree with:

- The plan to submit to the *International Journal of Medical Students* (IJMS); the contents of the manuscript; to being listed as an author; and to the conflicts of interest statement as summarized. I have had access to all the data in the study (if applicable) and accept responsibility for its validity.
- If my manuscript was approved for publication in the IJMS, I give my permission to the Editorial Board for publication and disclosure the document in the conditions and procedures that IJMS considered.
- I certify that I have contributed directly to the intellectual content of this manuscript, the genesis and analysis of their data, so I am able to take public responsibility for it and accept that my name appears on the list of authors.
- I guarantee that the manuscript is original and has not been published, in whole or in part, in another Journal, except as an abstract or Thesis (in which case attach a copy of the abstract or title page of the Thesis).
- If it has been published previously, I attached the original authorization of the Journal which was the primary publication for publication doubling in the IJMS.
- I will not receive royalties or other monetary compensation from the Editorial Board for the publication of the article in the IIMS.
- I have not committed scientific fraud, plagiarism or vices of authorship, otherwise hold harmless the IJMS and the Editorial Board, and declare myself as solely responsible.
- I agree not to submit this article to another journal for publication, to receive the Editorial decision of the IJMS on publication.
- Attached to my signature, I include what my participation in drafting the article presented for publication to the IJMS.

#### Conflicts of interest

Please complete the International Committee of Medical Journal Editors (ICMJE) Conflict of Interest Form, which is available at <a href="http://www.ijms.info/files/forms/coi\_disclosure\_2014.pdf">http://www.ijms.info/files/forms/coi\_disclosure\_2014.pdf</a>. The information provided in the ICMJE Conflict of Interest Form must match with the conflict of interest statement in the manuscript.

#### Role of the funding source

Did you received any funding to carry out this research?

Please disclose any funding sources and their role, if any, in the research process, writing of the manuscript or the decision to submit it for publication. If you are the corresponding author, please indicate if you had full access to all the data in the study and had final responsibility for the decision to submit for publication. The information provided here must match with the funding information in the manuscript.

#### Patient consent - completion of this section is mandatory for Case Reports

Please sign below to confirm that all necessary consents required by applicable law from any relevant patient, research participant, and/or other individual whose information is included in the article have been obtained in writing. If the manuscript is a case report, please complete the <u>Patient's Consent Form</u> for the publication of material relating to them in the IJMS. The signed consent form(s) should be submitted with all the requested documents using the IJMS platform at www.ijms.info.

## Author contribution table:

Term	Definition	
Conceptualization	Ideas; formulation or evolution of overarching research goals and aims	
Methodology	Development or design of methodology; creation of models	
Software	Programming, software development; designing computer programs; implementation of the computer code and supporting algorithms; testing of existing code components	
Validation	Verification, whether as a part of the activity or separate, of the overall replication/reproducibility of results/experiments and other research outputs	
Formal Analysis	Application of statistical, mathematical, computational, or other formal techniques to analyze or synthesize study data	
Investigation	Conducting a research and investigation process, specifically performing the experiments, or data/evidence collection	
Resources	Provision of study materials, reagents, materials, patients, laboratory samples, animals, instrumentation, computing resources, or other analysis tools	
Data Curation	Management activities to annotate (produce metadata), scrub data and maintain research data (including software code, where it is necessary for interpreting the data itself) for initial use and later reuse	
Writing – Original Draft	Preparation, creation and/or presentation of the published work, specifically writing the initial draft (including substantive translation	
Writing – Review & Editing	Preparation, creation and/or presentation of the published work by those from the original research group, specifically critical review, commentary or revision – including pre- or postpublication stages	
Visualization	Preparation, creation and/or presentation of the published work, specifically visualization/ data presentation	
Supervision	Oversight and leadership responsibility for the research activity planning and execution, including mentorship external to the core team	
Project Administration	Management and coordination responsibility for the research activity planning and execution	
Funding Acquisition	Acquisition of the financial support for the project leading to this publication.
